(a) error after each pass
(b) passes to 1% of sd
(c) passes to $10^{-8}$ sd
largest error, in posterior sd (median over sequences)
$T = 1{,}000$
1% of sd
$10^{-8}$ sd
pass $k$
passes (median over sequences)
sequence length $T$
$a_t \le 0.6$
$a_t \approx 0.5$
$a_t \approx 0.9$
$a_t \approx 0.99$
$a_t \approx 0.999$
random walk ($a_t = 1$)
